Dear President of the Sordocecita,

Thank you for your message. We understand the importance and urgency of your demands related to the classification of the deafblindness disabilities. Dr Eva Orsan has kindly introduced the topic during our meeting last November in Brussels. It is really an unique condition that must be considered in its specificity.

Our organization is now committed to update and discuss our already published recommendation about the Classification of Hearing loss in contribution with the OMS studies on this matter.

This work will be initiated in the next BIAP meeting (Brussels, May, 2025) and we will surely include your request in our agenda , led by Dr Orsan. She will contact you soon, since you have a deep knowledge about the difficulties experienced by this population.

all the best

Edilene Boéchat, PhD
Ass Professor of Audiology Catholic University of São Paulo PUCSP
President of the Bureau International d'Audiophonologie BIAP
